About Me

I have just finished third semester as a Computer Science student at the University of Warsaw, Poland. I am currently seeking an internship or part-time job to gain real-world work experience. I have a strong interest in mathematics and algorithms, and I am a quick and adaptive learner.

Education

University of Warsaw 2023 - Present
Completed first year - Computer Science

XXXV High School in Warsaw 2019 - 2023

Projects

My university projects are available on my GitHub: github.com/matikasp.

Achievements

- Participated in Hackarena 2.0 Hackathon
- Finalist of the STEM competition organized by the Warsaw University of Technology during high school

Skills

After completing my first three semesters of studies at the University, I have developed an understanding of programming languages such as: C/C++, NASM x86 Assembly, Java, and Python. I am also familiar with object-oriented (OOP) and imperative programming paradigms. Additionally, I possess knowledge of operating systems and computer architecture, and I have a solid understanding of fundamental algorithms and data structures. I also have an understanding of concurrent programming. Beyond practical programming skills, I am particularly drawn to theoretical computer science areas such as automata theory, formal languages, and computational complexity.

Languages

- **Polish:** Native
- **English:** Fluent, B2 level, self-proclaimed
